

A letter from your teacher...

5JW

I am so impressed with how you are all working on Google Classroom. It has been a real treat for me to see such amazing work uploaded each day. I've really enjoyed reading your descriptive writing and it has been extremely pleasing to see that many of you are using ISPACE to improve your sentence starters. In maths I've seen some excellent work and well done to those of you that have been showing your workings out too!

Over the next few weeks I'm looking forward to seeing more super science research work connected to our topic 'Water Life'. In project work you will be given the opportunity to present work in a range of different ways whilst exploring a variety of countries from around the world. Remember to keep doing the quiz every Friday and also keep your Welsh skills going by using those place mats as often as you can.

I am incredibly proud of you all for your hard work and resilience at this time. Please don't worry about any piece of work that you are not sure about or struggling with. Just move on and find something you are more comfortable completing. The most important thing is for you to stay safe and I hope to see you all again soon.

Mr Willmore
